

SPEED RAMP - 10MPH

Product Code: Speed Ramp

PRODUCT DESCRIPTION

This customisable speed ramp is easy to install, manufactured from recycled plastic and is a cost-effective way to reduce traffic speeds in a variety of hazardous locations such as car parks, hospitals, schools, sporting venues and other parking locations.

This model is designed for a maximum traffic speed of 10mph but 5mph and 15mph versions are available on request.

Prices displayed are for a 500mm length section and a pair of end sections which are 250mm length. The central sections come in alternating yellow and black whereas both end sections are yellow.

Additional lengths can be purchased in 500mm increments.

Fixing is via 20x100mm fixing bolts (included as standard).

- Length in travel direction - 400mm
- Width - 500mm central section plus a 250mm end section either side
- Height - 50mm
