

FORTRESS ILLUMINATED BOLLARD

Product Code: SFD588

PRODUCT DESCRIPTION

This professional and robust commercial bollard light has a Fortress head. A matte garden green or graphite black finish is available as well as a choice of height (400mm, 600mm, 800mm or 1000mm). Ideal for driveways and paths, there are also 3 styles of head: 'domed', 'pillar' or 'flat' top.

The head and 2.5mm thick extruded cylinder of the bollard are heavy duty die-cast aluminium. All screws are stainless steel, resulting in a completely rustproof and non-corrosive model.

Importantly, the Fortress head guards and protects the internal UV-stop polycarbonate lens and lamp from damage and vandalism. With 6 rings of robust aluminium surrounding the head, it is perfect for use in higher risk areas. Examples are gravel drives, public places, as well as areas where garden machinery may be used.

SPECIFICATIONS

Weight	14.00 kg
Height	600mm
Diameter	170mm
Fixing	Multiple Options
Material	Aluminium
Colour	Galvanised
