

UNIVERSAL RUBBER BOLLARD

Product Code: SFD5171

PRODUCT DESCRIPTION

The Universal rubber bollard has a simple, functional and timeless design. It is used wherever traffic limitation and maximum traffic safety are required. The collision force needed to bend the bollard to an angle of up to 45 degrees is 200 kilos.

Rubber Bollard is solid and consists of 60% new rubber and 40% of vulcanised rubber from the production of transmission belts and V-belts.
