

AIRLITE ILLUMINATED BOLLARD

Product Code: SFD5812

PRODUCT DESCRIPTION

The 'Airlite' is crafted from high quality aluminium and is a contemporary, elegant post light, available in heights of 400mm or 600mm. The durability of the path light is combined with the eye-catching 'bubble' effect in the substantial solid crystal glass head, to perfectly bridge the gap between decorative garden lighting and robust bollard lights. Air bubbles inside the head give a unique and pleasing effect which looks great in daylight or at night. Once illuminated, it acts as both a standard path light and as an uplighter, so if placed beneath trees the effect is amazing!
