

LITETOWER ILLUMINATED BOLLARD

Product Code: SFD5810

PRODUCT DESCRIPTION

Crafted from high quality aluminium, the modern 'Litetower' path light, is available in heights of 400mm - 1m. The simple but elegant design of this durable post light perfectly bridges the gap between decorative garden lights and more robust bollard lighting. The frosted glass inside the head softens and diffuses the light once it's illuminated. There is also a mirrored reflector on the inside of the head to enhance the light emitted. A clever design feature and aesthetic quality of the Litetower path light is that the taller lights have longer heads to keep in proportion.

SPECIFICATIONS

Weight	3.00 kg
Height	400mm
Diameter	89mm
Fixing	Surface Mounted
Material	Stainless Steel
Colour	Galvanised
