

SANITISATION POINT - BERING

Product Code: SFD713

PRODUCT DESCRIPTION

Sanification Point BERING is a practical and intuitive solution for indoor use.

The system includes an openable compartment which can store one bag for waste collection and one box of devices, such as disposable gloves, face-masks or antibacterial wipes. To ease the use, specific decals can be applied for a clear visual indication.

Thanks to appropriate pre-arranged holes on the front side, the module can be equipped with a battery powered automatic dispenser of hand-sanitiser or with a stainless steel universal bottle-holder, making it an elegant and compact hand sanitisation station. The automatic dispenser comes with a practical drop-collector.

SPECIFICATIONS

Weight	128.00 kg
Length	310mm
Depth	303mm
Height	1440mm
Fixing	Root Fixed
Colour	Galvanised
