

SWAY FLOW ILLUMINATED TIMBER BOLLARD

Product Code: SFD594

PRODUCT DESCRIPTION

A unique domed design with a continuous ultra-bright LED strip following the contour of the bollard. Fitted with energy-efficient LED low voltage lamp unit. Can be used in multiple areas including car parks, driveways, paths, commercial areas, and even indoors!

Made from components that can be recycled or naturally decomposed at the end of its useful life. All bollards are given a coat of Danish oil before leaving the factory.

Milled from “green” timber this lighting bollard will crack, twist and warp over time – this is completely normal and just adds to the character, no two bollards will ever be the same!

- 12v high brightness LED Strip
- Integrated mains LED driver
- Oak & Larch timber options
- 1 Year warranty on electrical components
- Easy to install
- Low maintenance
- Sustainably sourced timbers
- Approximately 8.0Kg (Larch) and 9.5Kg (Oak) of sequestered carbon
