

BLUE GRASS STAINLESS STEEL PLANTER

Product Code: SFD622

PRODUCT DESCRIPTION

The Blue Grass Stainless Steel Planter is made in India and is made to a very high standard from 304 grade brushed stainless steel.

Blue Grass Stainless Steel Planters come in three standard sizes all of which compliment each other. They look great individually, as a pair of the same size or as a set of three.

The planters are fully welded and have been lined to avoid soil from corroding the inside. Therefore, a separate liner is not necessary.

Blue Grass Planters are sleek, elegant classic planters which are the perfect accompaniment to plants in any interior or exterior space. For that touch of luxury at an affordable price.

These planters are perfect as window boxes, stand alone planters, or they can be fixed to walls or railings.

The Blue Grass Planter comes in a variety of standard sizes from our imported range.

If you cannot see the size that you are looking for, bespoke sizes of Stainless Steel Trough Planters can be made. However, bespoke sizes are made in the UK from British steel and are often a higher price. Please contact us for more information.

We also offer a wide variety of standard sizes in other shapes such as cylinders, cubes, tall squares and tapered squares. All of these will compliment the stainless steel planters.

Please note that these planters are not suitable for being placed near a source of salt water. (i.e. sea air) Please ask us to quote for marine grade stainless if required.
