

EV CHARGING POINT PROTECTION BARRIER

Product Code: EV Charging Point Protection Barrier

PRODUCT DESCRIPTION

Protect your investment and ensure safety with our high-durability protection barrier, designed specifically for electric vehicle (EV) charging stations.

Whether you're installing charging points in commercial, public, or residential locations, this barrier provides a critical line of defense against accidental vehicle collisions and environmental wear.

Key Benefits:

- **Maximum Equipment Protection** - Shields your EV charging station from impact damage caused by vehicles, helping to prevent costly repairs and minimize downtime.
- **Enhanced Safety** - Reduces the risk of electrical hazards by preventing damage to high-voltage equipment. Safeguards both users and nearby pedestrians.
- **Compliance Ready** - Meets industry best practices and may help satisfy local building codes or insurance requirements for public and private installations.
- **Built to Last** - Constructed from robust materials designed to withstand daily wear and impact, ensuring long-term performance in any environment.
- **Cost-Effective Risk Management** - Prevents unexpected repair and replacement costs, making it a smart, proactive investment for any EV infrastructure.

Ensure safety, reliability, and peace of mind—add a protection barrier to your EV charging point setup today.

SPECIFICATIONS

Weight	11.00 kg
Width	500mm
Height	500mm
Diameter	48mm
Fixing	Surface Mounted
Material	Stainless Steel
Colour	Brushed Satin
