## PRODUCT DESCRIPTION

Steel Door Barriers are an essential addition to any industrial complex where the door opens on a busy thoroughfare.

For an automatic swing door to comply with the guidelines set out in EN16005 every door must have barrier rails protecting the side approach.

A steel door barrier with a rubber bung offers a combination of strength, durability, security, and aesthetic appeal, making it a reliable choice for various door protection needs and meets EN16005 Guidelines.
